CAREER PROFILE

Junior Full-Stack Developer who owns production web apps end-to-end. Currently leading technical delivery at Ajani Digital Smart Guide Services, building a React + Express 5 + MongoDB booking marketplace for hotels, shortlets, and event halls in Oyo State. Creator of EatOrder and Speedtouch, deploying full-stack architectures on Vercel/Render with Supabase Postgres and strict Row Level Security. Deeply comfortable across React 18/19, Tailwind v4, Framer Motion, TanStack React Query, RESTful API design, JWT-based RBAC, and modern CI/CD deployment pipelines. Passionate about clean architecture, accessible UX, optimized performance, and shipping robust features fast.

WORK EXPERIENCE

Junior Full-Stack Developer

Oct 2025 – Present

Ajani Digital Smart Guide Services – Ibadan, Nigeria

- Primary developer on the Ajani marketplace platform; own frontend, backend, database design, and deployment pipelines end-to-end, reporting directly to the founder.
- Translate dynamic product requirements into shipped features on a weekly cadence: scope technical tickets, build, test, and iterate based on daily stakeholder reviews.
- Architect and scale the React + Vite frontend, Express 5 / MongoDB REST API, robust JWT-based RBAC, and Cloudinary asset management pipeline.
- Build and maintain three specialized audience surfaces on one unified codebase: customer search & booking flow, vendor onboarding portal, and the master admin moderation panel.
- Manage complete DevOps lifecycle: Vercel + Render deployments, environment variable management, Resend transactional email architecture, PDFKit automated receipt generation, and analytics instrumentation.

Front-End Engineer | MIS Specialist (Intern)

Jan 2025 – Dec 2025

SOCU, Oyo State Secretariat – Ibadan, Nigeria

- Supported NASSP by managing complex management information systems (MIS) that tracked poor and vulnerable households across rural communities in Oyo State.
- Designed and developed responsive front-end web interfaces using HTML5, CSS3, JavaScript (ES6+), and React.js to cleanly visualize field operations data.
- Maintained and updated the Social Register Database, successfully ensuring strict data integrity, information security, and timely pipeline reporting.
- Created performance-optimized dashboards and monitoring utilities for internal stakeholders to access program data and evaluate poverty-alleviation interventions.
- Collaborated with data enumerators, M&E teams, and program officers to streamline multi-channel data collection, validation, and reporting workflows.

KEY PROJECTS

Ajani Digital Smart Guide Services (Booking Marketplace • [ajani.ai](#))

React 18, Vite, Tailwind v4, Express 5, MongoDB, Supabase, JWT

- Architected an end-to-end marketplace covering search routing, vendor onboarding with AI listing description generation, touch-drag availability calendars, email-link payout action pages, and automated field-agent management panels.
- Designed a highly secure, layered Express 5 REST API (routes, middlewares, controllers, services, models) hardened with Helmet, CORS allow-listing, express-rate-limit, HPP, mongo-sanitize, and centralized error handlers.
- Modeled robust domain entities (User, Listing, Booking, Review, Payment) via Mongoose and integrated Cloudinary (multer), Resend transactional email, and automated PDFKit receipt engines.
- Built an Airbnb-inspired multi-step search interface using portal-rendered Where/When/Who popovers, custom range calendars, and layout-driven shared-element transitions powered by Framer Motion and TanStack Query caching.

Speedtouch (E-Commerce Storefront • [speedtouch.com.ng](#))

React 19, Vite, Supabase (Postgres, RLS), Paystack, PWA

- Shipped a high-performance storefront complete with Jumia-style product strips in NGN, advanced category filtering, live local-storage persisted cart drawers, and a secure dashboard (Revenue, Orders, Products with low-stock alerts).
- Designed a Postgres schema protected by advanced split Row Level Security (RLS) rules and a custom database trigger that atomically decrements product stock on successful checkout inserts.
- Integrated Paystack inline checkout popup inside a promise-based wrapper, keeping the core database isolated from polluted or incomplete transaction states.
- Engineered a fully installable Progressive Web App (PWA) with smart updates, offline assets caching (Workbox), platform-aware install triggers, and aggressive 1-year cache-control optimization on Vercel.

TECHNICAL SKILLS

Frontend	React 18/19, Vite, Tailwind CSS v4, Framer Motion, React Router 7, TanStack React Query, React Hook Form, Lucide / React Icons, Leaflet, JavaScript (ES6+), HTML5, CSS3
Backend	Node.js, Express 4/5, REST API Design, Mongoose, Multer, Helmet, express-rate-limit, express-validator, http, mongo-sanitize
Database & Auth	MongoDB, PostgreSQL, Supabase (Auth, Database, Row Level Security), JWT, bcrypt
Cloud & Tooling	Cloudinary, Vercel, Render, cPanel, Git, GitHub, npm
AI Productivity	Claude (Sonnet/Opus), Claude Code CLI, DeepSeek, ChatGPT, Cursor (highly efficient scoping and shipping features with AI agents)
Core Practices	RBAC, JWT Auth, route-level code splitting, client-side caching, responsive mobile-first design, accessibility, analytics instrumentation, SEO optimization

EDUCATION & CERTIFICATIONS

B.Sc Economics

Dec 2020 – Mar 2024

Ladoke Akintola University of Technology, Ogbomoso, Nigeria

Professional Diplomas in Front-End Web Development

2023 – 2024

Udemy (2023) • Facebook/Coursera Certification (2024)

Open to junior/mid full-stack and front-end opportunities (Remote, Lagos, or Ibadan-based).
